

# A foundation of sustainability.

The UK's only  
*Circular-First*  
workplace  
technology  
business

agilico<sup>A</sup>

# Greener Pastures.

At Agilico, we support the worldwide effort to build a better future for people and planet.

**We're proud to be the UK's pioneering  
Circular-First workplace technology business.**

From supporting the United Nations Sustainable Development Goals, implementing a wide range of environmental initiatives, and achieving scope 1 and 2 Net Zero status by 2030, we're dedicated to integrating sustainable practices throughout our operations.

# A Circular Target.

The circular economy is a **smart and sustainable** way of doing business.

Instead of the traditional *'take-make-waste'* model, where resources are used once and then discarded, the circular economy keeps resources in use for as long as possible, extracting their maximum value and then regenerating them into new products or materials.

By **reusing and refurbishing materials**

where possible, businesses can significantly reduce the amount of waste that ends up in landfill.

Embracing the circular economy allows organisations to reduce their environmental impact, create new economic opportunities, and work towards a more **sustainable future** for everyone.

# The Sustainability Suite.

From transitioning to an electric company car fleet, installing solar panels at our sites, prioritising the use of recycled materials for our packaging and office supplies, and much more, we're on **a sustainability mission.**

Our workplace technology solutions follow the same lines, helping organisations reduce their carbon footprint and adopt more environmental ways of working.

# MFDs Reborn.

From North to South, our Agilico Zero MFD refurbishment centres are doing great work in the circular economy.

At these sites, our qualified teams of expert engineers refurbish and give a new lease of life to ex-showroom or low-utilisation devices.

This results in incredibly reliable machines ready to perform at the highest level once again, **delivering savings of up to 594 Kg CO<sub>2</sub>e emissions** when compared with a brand-new device - that's almost the equivalent of a return flight from London to New York!

# Doing What They Do Best.

When MFDs reach the end of their life or contract term, our expert team of engineers reclaim them to one of our specialised workshops.

There they disassemble them into component parts to identify anything that can be refurbished and reused to help **extend the life** of other devices.

By working with accredited partners to recycle what we can't reuse, we ensure no materials are wasted.

# Paper Erasers.

Traditional workplace processes have always used paper, and lots of it.

Paper still plays an integral role in some operations, but our smart software solutions allow organisations to move many paper-based processes to digital workflow.

**Document Management Systems** house otherwise paper files as collaborative digital assets – secure and easily accessible from anywhere.

**Verify Automated Invoice Processing** software removes the need to handle printed documents, by automatically capturing, extracting, routing and posting invoices into a finance system, without a paper invoice in sight.

**Digital Mailrooms** swiftly capture, digitise, organise and route any type of inbound mail to the right teams and individuals, with no need for complex paper trails.

# Eco Speak.

Telephone communications once involved massive amounts of infrastructure and hardware to be housed on-site.

But with **Agilico Connect Hosted VoIP**, our digital telephony system, you run everything through your existing internet connection, via softphones on mobiles, laptops and other devices.

No additional copper wire installations. No purchasing dozens of plastic telephones and cabling. Just a lightweight, collaborative and resource conserving telephone system.

# Conservation Inspiration.

We want our actions to cause a ripple effect across our business, our customers, our network and our supply chain.

**Every action, no matter how small, has the power to create meaningful change.**

Together, we can amplify our efforts and pave the way for a more sustainable tomorrow.

If you want to join us on our journey of sustainability, please get in touch.

**We're always looking to work with like-minded people who are passionate about making a difference.**

**0330 058 0505**
